

Linked Chain Necklace Kit

Contents:

- 1m rose gold chain
- 1m rhodium chain
- 1m gold chain
- 60 cm fine silver chain
- 20 cm oval link gunmetal chain
- Jump rings in all above colours
- 1 organic metal loop
- 1 lobster clasp
- Small charm x 1

Prepare the chain by cutting them into the following lengths:

4 x 18 cm lengths in gold

4 x 18 cm lengths in rose gold

4 x 18cm lengths in rhodium

*Please have a look at our online video for more detailed instructions if you have not seen how to open and close jump rings.

Start by making two rhodium chain loops:

1. Fold the 18cm chain length in half. Connect the open ends with a jump ring.

2. Before you close the jump ring, fold the chain in half again, and place the link of the folded chain through the jump ring and close securely, creating a loop.

3. Now take the second 18cm rhodium chain, fold in half, and feed it through the first finished loop.

Connect the open ends and folded end with one jump ring to create another loop. This creates a new loop connected to the first loop you made.

Continue with the same technique, connecting loops in a row to create the necklace in the following colour order:

- 2 rose gold linked loops
- Followed by 4 gold linked loops
- Followed by 2 rose gold linked loops
- Followed by 2 rhodium linked loops.

4. Before you close the last silver jump ring, attach one end of your fine silver chain on it, then close securely.

Now run your fine chain through your linked chain necklace, threading through the loops until you get to the other end of the necklace.

Secure the fine chain on the main chain loops at either ends of the necklace, with a jump ring.

5. Now prepare your gunmetal oval chain to create a large single loop that opens and closes with a clasp, this will make the necklace look seamless.

6. Cut 1.5cm off the end of the oval chain and then again another 1.5cm.

Re-attach these two lengths to the chain with a gunmetal ring in between each short piece. This creates an extender chain that makes the necklace adjustable.

7. Carefully attach your lobster clasp with a small jump ring to the other end of the oval chain.

8. On the right hand side of the necklace attach a gunmetal jump ring to the silver jump ring at the end.

Slip the organic metal loop through it and close the jump ring.

9. Carefully attach your small charm to a jump ring and close.

On the left hand side attach a gunmetal ring to the last silver ring, slip the small charm onto it as well as the end of the oval chain (opposite side from your clasp), and close.

You should end up with the 3 jump ring extender on this side

To open and close the necklace, feed the oval link chain and clasp through the metal loop and back on itself, this makes one large, adjustable, single loop.

Notes:

Difficulty level – medium

Time to complete – 2 to 2.5 hours

For more tips on how to assemble your kit, or if you would like to ask a question, please have a look at our Facebook page: Nadia Minkoff London Workshops.

*Please note, there may be minor variations in the contents compared to the images. Our kits are made in the UK so if we run out of any beads or parts we will substitute them with something very similar and within the same colour and theme. There will always be enough to complete your creation. When making your jewellery please be aware that there will be small parts that need to be carefully disposed of. Please be careful of this if you have small children nearby.
