

# Jewellery Pliers

## Flat nose pliers (also known as chain nose)

Overall, most used pliers:

- Opening and closing loops
- Bending pins & shaping wire
- Securing crimps
- Holding small items

## Round nose pliers

- Use for looping pins and wire

The cone shape ends mean you can adjust the size of the loops you make.

## Side Cutters

- Cutting metal wire or pins

Be sure to face the flat side (not dipped side) towards you so that you can see exactly where you are cutting.

For more tips on how to assemble your parts, or if you have any questions, please have a look at our Facebook page: [Nadia Minkoff London Workshops](#).

\*Please note, there may be minor variations in the contents compared to the images. Our kits are made in the UK so if we run out of any beads or parts we will substitute them with something very similar and within the same colour and theme.
